

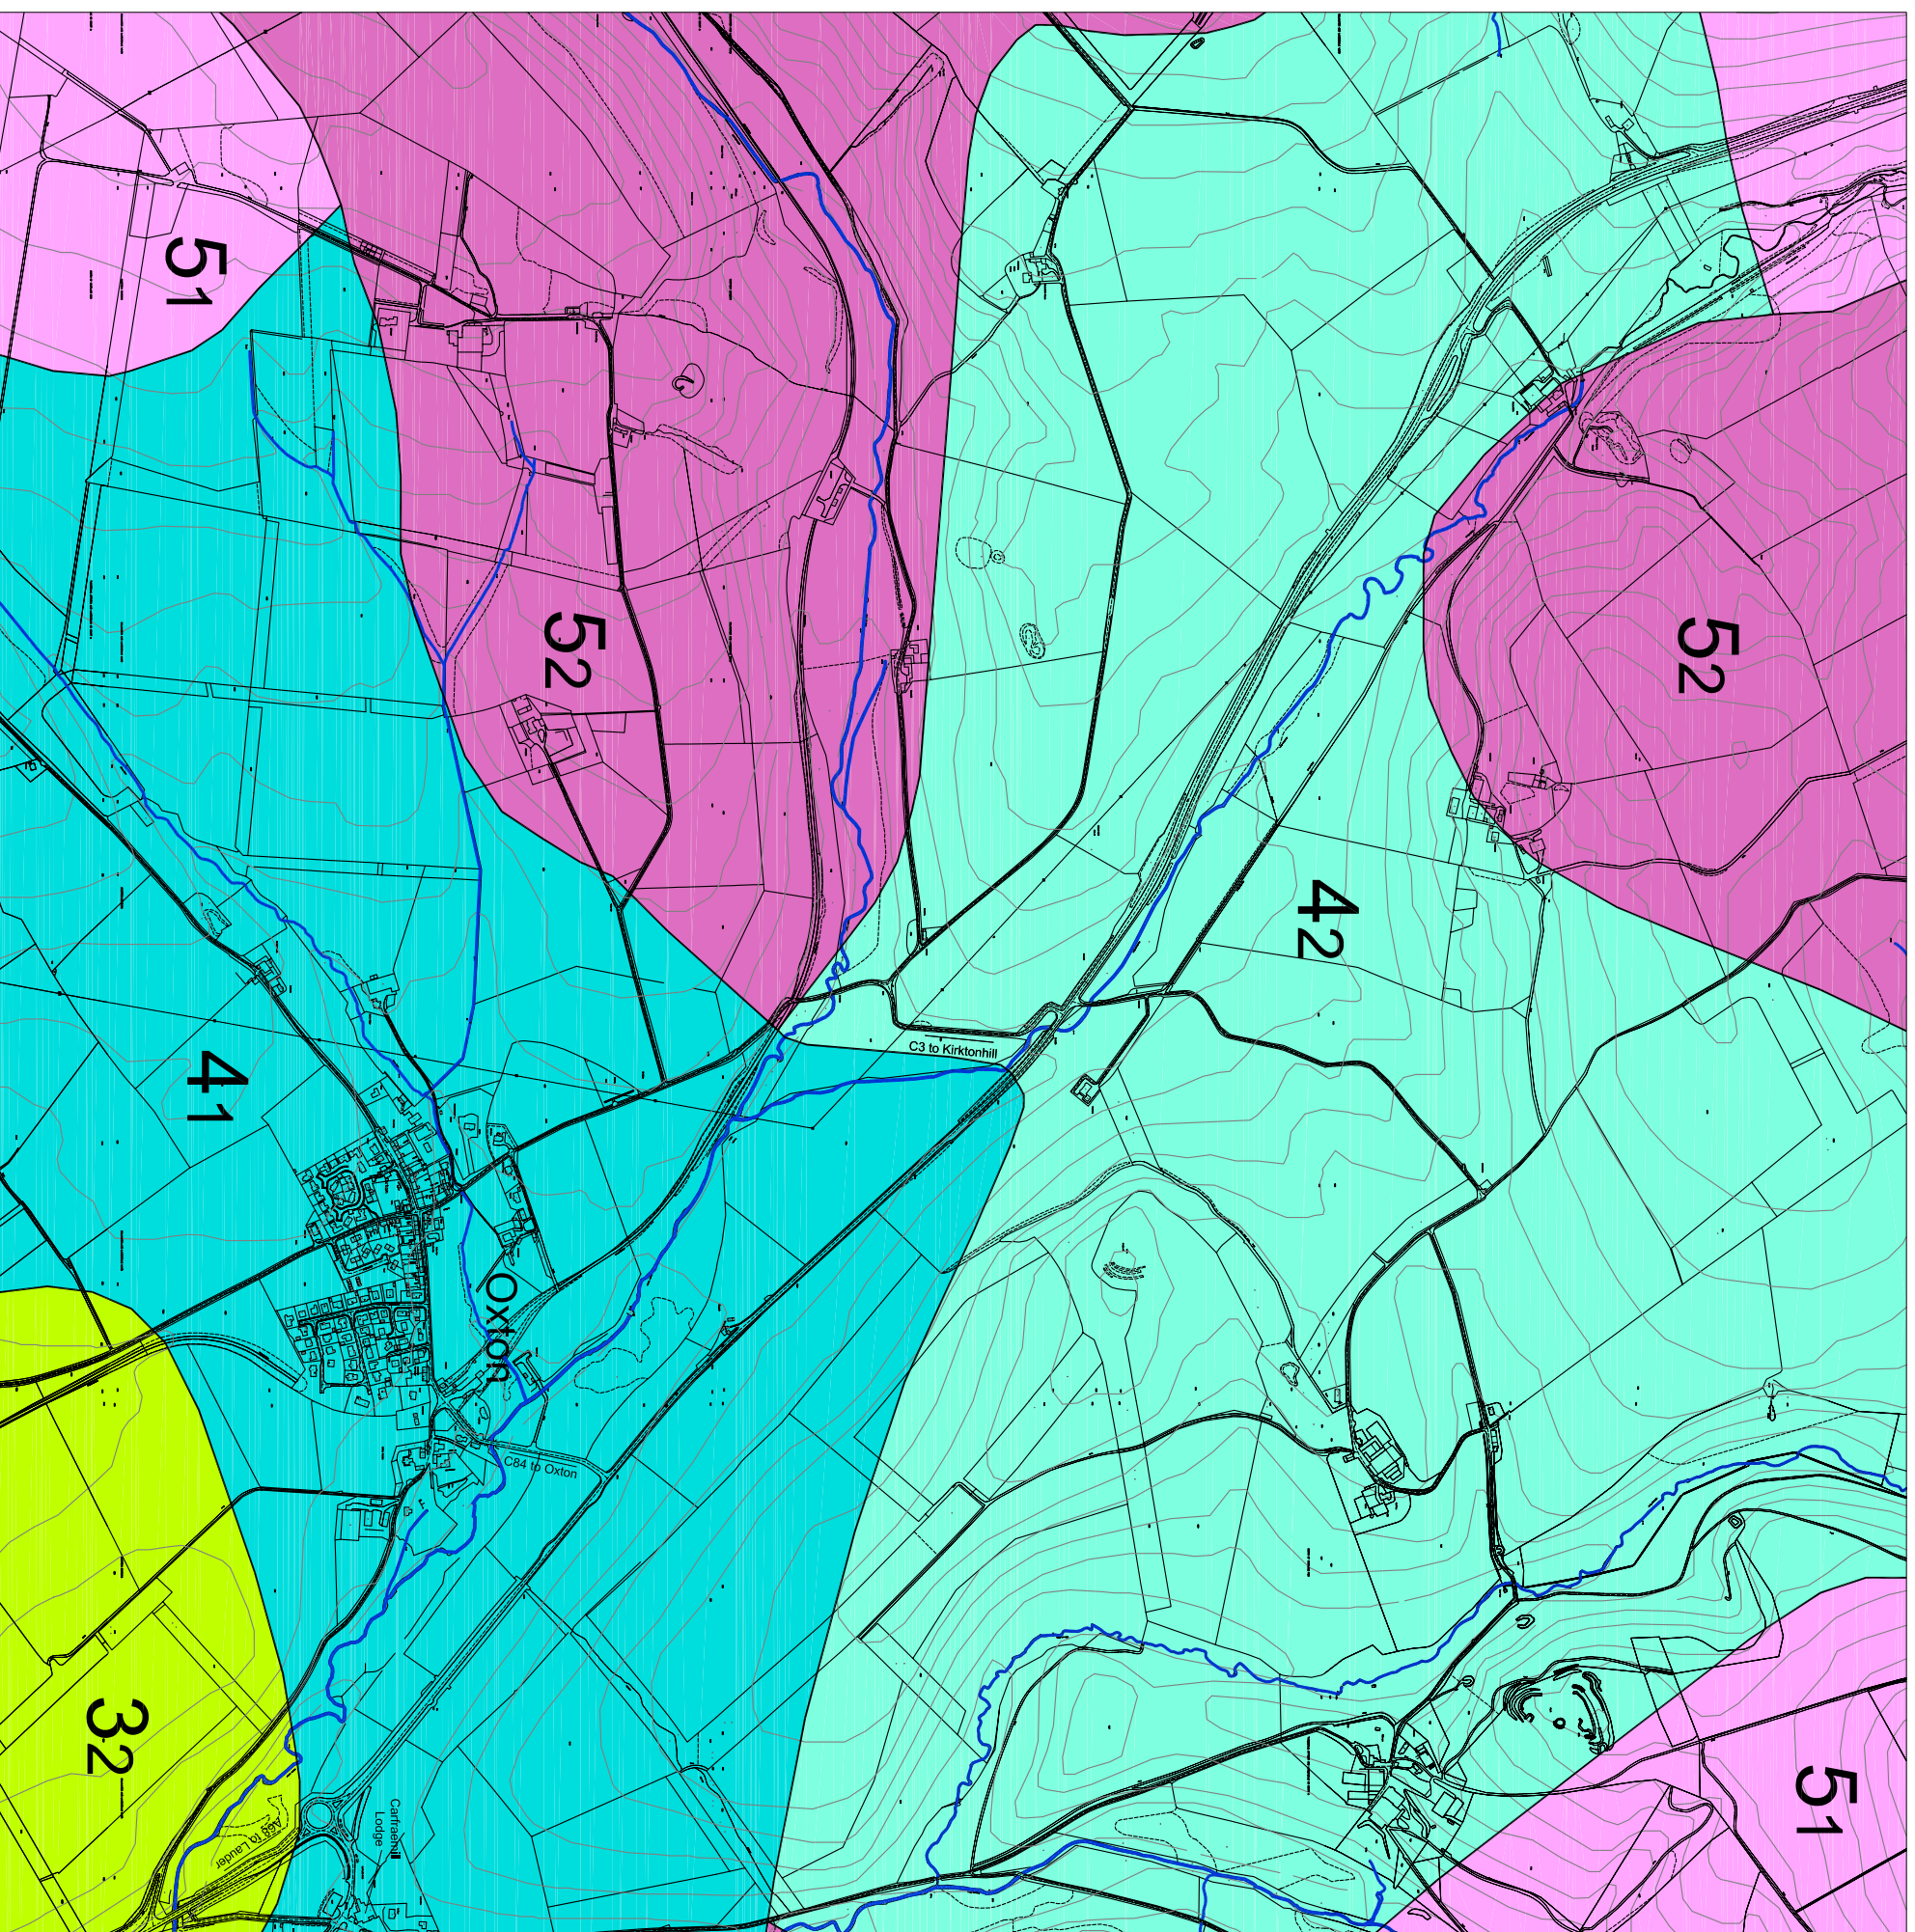

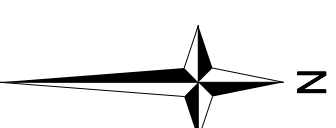

Figure 7.2

- LEGEND**
- LAND SUITED TO ARABLE CROPPING**
- LAND CAPABLE OF PRODUCING A MODERATE RANGE OF CROPS**
- 32 Land capable of average production but high yields of barley, oats and grass are often obtained.
- LAND CAPABLE OF PRODUCING A NARROW RANGE OF CROPS**
- 4 Land suited to rotations, yields of grass are high but difficulties of utilisation and conservation may be encountered.
 - 42 Land is primarily grassland with limited potential for other crops, grass yields can be high but difficulties of conservation or utilisation may be severe.
- LAND SUITED ONLY TO IMPROVED GRASSLAND AND ROUGH GRAZINGS**
- LAND CAPABLE OF USE AS IMPROVED GRASSLAND**
- 51 Establishment of a grass sward and its maintenance present few problems and potential yields are high with ample growth throughout the season.
 - 52 Sward establishment presents no difficulties but moderate or low trafficability, patterned land and / or strong slopes cause maintenance problems.
